VOL. XXXII. No. 38.

DIDS BURY, ALBERTA, THURSDAY, SEPTEMBER 19, 1935

82 00 per year. 5 cents a copy.

Canadian Wheat Board Announces Purchase Prices for Carlots.

No. 1 Hard Set at 89c Ft. William. Feed Wheat Not Listed.

With the exception of 'feed' wheat the prices at which the Canadian Wheat Board will purchase all grades of wheat from producers, on a carlot basis, were announced Tuesday.

When such wheat is purchased by the board, a "producer's certificate" will be issued, entitling the grower to participate in any surplus which may arise from the board's operations.

All prices relate to grain, basis in store, at Fort William or Vancouver.

No price has yet been set for 'feed' wheat, the board having difficulty in appraising its market value, but the board does not anticipate a price of less than 50c for this grade shortly.

The schedule of prices, in part, follows:

No. 1 hard 89; 1 northern 87½; 2 northern 85; 3 northern 81; No. 4 wheat 76; No. 5 wheat 69; No. 6 wheat 61; No. 1 Garnet 82½; No. 2 Garnet 81.

Shiffer-Hillman PRESENTS . . .

A most extensive range of popular priced hand tailored, made to measure clothes for Fall.

Over 250 fabrics from which to select.

Celanese and satin linings used exclusively.

Styling by a recognized, expert designer.

We are particularly proud of the tailoring in the Shiffer-Hillman Clothes. Styles are right up to the minute. The cloths are all British Woollens.

PRICES RANGE FROM
\$24.50 to \$35.00

Nominations Close In Thirteen Alberta Ridings on Sept. 30

With advance nominations to take place September 30 in nearly one-third of the electoral districts, full instructions already have been issued to the various returning officers.

In 76 electoral districts these advance nominations will be held on September 30. In the remaining 167 districts, which include Halifax and Queen's, P.E.I., each electing two members to the Dominion house, nominations will take place on October 7, a week from polling day.

In Alberta advance nominations will be held on September 30 in 13 of the 17 ridings, as follows: Acadia, Athabasca, Battle River, Camrose, Jasper-Edson, Lethbridge, Macleod, Medicine Hat, Peace River, Red Deer, Vegreville and Wetaskiwin.

Nominations for the two Calgary and two Edmonton seats will close October 7.

Save Vegetables for Annual Drive

The committee which has had charge of the drive for donations for the Wood's Christian Home and the Junior Red Cross for the past few years have announced that they are again arranging for a drive to take place as soon as threshing is completed.

It is suggested that when the potatoes, carrots and other vegetables are being gathered that a share of the surplus be sacked and put aside for the collectors when they come around. They will see to it that they are delivered to the Wood's Home or Junior Red Cross. Better still, if convenient they can be delivered to Mr. J. A. McGhee, who will take care of same.

Donations of wheat, meat, chickens or cash will be very welcome.

Ontario Farmers Buy Alberta Feeders

Alberta cattle are being purchased in quantity this year to supply Ontario feed lots, from information received last week from the Producers Livestock Commission Co., who expected to forward a preliminary shipment of 300 head east during the weekend.

Though practice of purchasing in the west in the fall to fill winter lots is customary, livestock men say that this year is the first for some time that buyers have been in Alberta to supply Ontario demands.—CALGARY HERALD

Evangelical Church Notes

Rev. A. A. Lytle, district secretary of the British & Foreign Bible Society will bring the message at the morning service on Sunday. In the evening the Pastor's sermon will deal with the question, "Can We Turn Our Backs On God?"

At the business meeting of the Evangelical League of Christian Endeavor held last Monday evening the following officers were elected:

President, Gerald Boettger; Vice-Pres., Clarence Cunningham; Recording Secy., Mary Wrigglesworth; Correspond Secy., Ruby Tugge; Treasurer, Lila Wrigglesworth.

The Popularity Contest Closes October 12

During the next three weeks the contestants of the Popularity Contest will have to put forth their best efforts for the contest closes on Saturday, October 12th.

The leaders are running very close and from the reports we get anything can happen before the close of the contest.

Contestants are asked to deposit all their votes during the next week as the names of the leaders will not be published during the last two weeks of the contest.

One of the best ways to help your favorite win the contest is to pay your subscription to the Pioneer. 3,000 votes are given with every year's subscription both new and renewals.

Loud Laughs Will Greet Latest Comedy Drama

Hilarious laughter will greet the showing of "Honeymoon Limited," with Neil Hamilton and Irene Hervey, next Wednesday and Thursday at the Opera House.

The plot of this new Monogram film concerns the adventures of an author who is renowned for his rather egotistical autobiographical accounts of his travels. The author in this case, enacted by Neil Hamilton, sets out incognito on a transcontinental walking tour which lands him in some of the most thrilling and excruciatingly humorous situations depicted on the local screen for many a day. Arriving near the western end of his pedal excursion the writer seeks refuge for the night in a deserted mountain lodge where he encounters, variously, a beautiful young woman who, with her two twin sisters, is seeking refuge from a savage old relative; a band of crooks intent upon recovering loot which has been hidden in the resort, a nosy constable, and a rather vague young man who turns out to be the actual owner of the place.

Hamilton seldom has had a role more befitting his innate talents and acquits himself with remarkable distinction, as does Irene Hervey appearing opposite him. The players who almost steal the show, however, are a pair of 5 year-old-twins, little Joy and June Filmer, a couple of winsome little Misses who enact their respective parts with an innocent mischievousness which will endear them to the hearts of local audiences. Altogether, "Honeymoon Limited" is an excellent adaptation of the Vida Hurst novel.

Wheat Threshing Has Commenced

The hum of the threshing machines was heard in several places east of town the beginning of the week, but threshing generally will not be in full swing for another week.

Corney Reimer commenced on Saturday, and Jake Brown, W. C. Ahlgren, C. Deadrick and C. M. Pratt got going the first of the week.

Several loads of grain have been brought into the elevators, but the quality has been hurt considerably by the frost. The grain brought in so far has graded all the way from No. 1 Garnet to Grade 6.

While the yield has also been effected by the frost, one farmer reports his crop as yielding 25 bushels to the acre.

Public Library Will Buy New Books

According to C. R. Ford, secretary of the Library Board, the Library will purchase about 100 new books in the near future.

A grant of \$54.00 has been received from the Provincial government and on Monday evening the town council made a grant to the library of \$75.00, of which \$50.00 is to be used in purchasing books. The balance of the town grant will go towards operating expenses.

Didsbury Library was the first to be established in any of the smaller towns in Alberta and has been in continuous operation since its inception. It is very well patronized, about 200 books being issued each week.

It has been suggested that a considerable addition could be made to the number of books in the library if citizens would donate the books they have finished with to the Library. The librarian and the board would be pleased to accept any donations of books.

Miss Evelyn McGhee is now the librarian, having been appointed to succeed her sister, Miss Bernice, who gave good service to the library for several years.

Duck Hunters Get Good Bags

The season for shooting ducks and geese opened at noon on Monday, and from reports received ducks are more plentiful than for several seasons.

Several parties went out Monday and found shooting very good. Len Berscht and Goldie Gabel each got their limit, while George Julien bagged 14 and Ed Watkin 11. Both parties were shooting around the sloughs northwest of town.

The Most Delicious Tea "SALADA" TEA

Make Your Own Job

Conditions throughout the world during the past five years have admittedly been most discouraging to all people, but especially so to youth. As boys and girls have come out of school and college, ready to take their place in the business world, even at the bottom of the ladder, they have discovered there was no place for them. They have been denied even the opportunity of making a start because the financial and economic world has been out of joint, with business marking time, and no development work being undertaken.

As a result, thousands have become discouraged, embittered because of denied and frustrated hopes and ambitions, have become drifters because they have lost hope for the future and accepted the easy but mistaken view that present conditions must be accepted as permanent conditions. Lacking any background of years in which work was plentiful, and having no experience in profitable employment, they can see no light ahead.

Such an attitude of mind is a terrible mistake. Future years will be just as bright, in fact brighter; just as busy, in fact busier; just as rich in opportunity and in enterprising development, in fact more so. The world will not stand still; neither it will move backward. Since the beginning of time and the dawn of civilization the movement, despite temporary setbacks, has always been both onward and upward. It will continue so.

Consider the most familiar names of people and products on the lips of practically everybody to-day—Henry Ford, Firestone, H. J. Heinz, Coca-Cola, Borden's Milk, Hires' Root Beer, Welch's Grape Juice, Maxwell House Coffee, Jell-O, and similar names. Do these names mean anything to the youth of to-day? They should.

It was in 1890 that Henry Ford began working on a double-cylinder engine in a little shop on his farm. When he went to work in Detroit at \$45 a month he took his shop along, and in 1893 his gasoline buggy was running and for a long time was the only automobile in Detroit. Forty years later he was rated a billionnaire.

Firestone was a buggy salesman who became convinced there was a great future in the rubber business. He bought strips of rubber, cut out crude solid tires and fitted them to buggy wheels. Thus began the great tire industry of to-day.

H. J. Heinz used to grow horse-radish in his garden and peddle it from door to door. This backyard venture put him on the road to becoming Heinz 57.

In 1886 a doctor in Atlanta stood working over a kettle in an old house. On the next corner was a drugstore, and periodically the doctor rushed over, squirted carbonated water into a glass containing a sample of syrup, and tasted the mixture. After about 300 attempts he had the first Coca-Cola.

While holidaying in New Jersey, Charles E. Hires was served a drink by a farmer's wife. Its ingredients were sassafras, teaberry, and sweet fern, all gathered locally. Hires smacked his lips. Returning home he experimented with herbs, roots and barks. Thus was Hires' Root Beer born.

John Wanamaker, the great merchant prince of the United States, delivered his first bill of goods from a wheelbarrow. Adam Gimbel, founder of the stores which bear his name, started with a pack on his back. Timothy Eaton started in a little corner lot store. The story of Woolworth's five-and-ten cent stores is too well known to call for repetition. The great Crane Company, manufacturers of piping, valves, bath-room fixtures, etc., had its inception in a little brass foundry.

These great enterprises of to-day had very humble beginnings, many of them within the life of the present generation. Opportunities are just as great to-day. "What's going to alter our lives is probably happening this minute in a backyard workshop, where some crank is thinking by himself," Henry Ford declared recently. Another man states it this way: "Many of the million-dollar corporations of to-morrow are starting to-day with little capital but an idea. They are beginning in attics, cellars, kitchens, and in the minds of clerks behind store counters."

Recently the head of a huge business in the United States selling many different products told about four new products, all launched since January, 1930, and now selling widely. David was not afraid of Goliath, and observant youth with an idea or capable of assimilating one, with vision, enterprise and daring can just as successful win out against the Goliaths of big corporations.

To quote Henry Ford again, who recently said that unemployed people "should create their own businesses, no matter how small, instead of waiting for some one to give them a job." And as a writer in *Forbes' Magazine*, from which much of the above is taken, says: "Ten years from now we will be reading more success stories gathered from the kitchens and cellars of 1935." No one who has a work-bench or a stove and a dollar—and an idea—he says, need be discouraged.

Scrambled Eggs

Motor Accident Scatters Truckload Of Eggs Over Highway

Marion Snyder, of Harlan, Ind., knows what 100,000 scrambled eggs look like.

Driving a truck over Pocono Mountain near Mt. Carmel, Pa., Snyder was forced to turn the machine sharply to avoid hitting a train. His cargo of 100,000 eggs was scattered over the highway for some distance. Practically all of the eggs were broken.

Rainbows are not semi-circles, but complete circles. If we were high enough in the air, we could see the entire circle.

British laundries have an annual revenue of approximately \$10,000,000 from handkerchiefs alone.

Leprosy reached the United States from both Europe and Africa.

A Large Birthday Gift

British Secretary Of Air Receives Two-Plane Hangar

Lord Londonderry, British Secretary of Air, has just celebrated his 57th birthday, and his wife's present to him was a hangar big enough to accommodate two airplanes. It stands on his estate at Mount Stewart, Newtonards, Northern Ireland, where there is already an airport with a landing field of 50 acres.

The deep-sea fish, *Chiasmodon Niger*, famous for its voracity, sometimes manages to swallow a fish larger than itself.

More common colds are contracted during October than in any other month, according to records of the public health service.

Before you invest in a going concern, make sure you know which way it is going.

Gift Was Acceptable

King Pleased With Jubilee Offering From Free State

The Jubilee present which Loyalists in the Irish Free State have given King George is declared to be not only nationally appropriate but most acceptable to His Majesty. It is a beautiful antique silver potato ring. These rings, which measure up to a foot in diameter, were in former times put in the centre of the dining table and within them were placed the potatoes, cooked in their jackets, to keep them from rolling about. Reminiscent of the days when the potato was the staple diet even of the wealthy, a sixteenth century ring of good design has sold at auction for considerably over \$5,000. The King is as devoted to old silver as the Queen is to antique furniture.

Strange Service

700 Deaf Mutes Worship In St. Paul's Cathedral

One of the strangest and most touching services ever held under the mighty dome of St. Paul's cathedral on a recent Sunday saw 700 deaf and dumb persons from 14 nations pray and sing without a sound being heard. They were athletes attending the fourth international games for the deaf and mute held in London. The service was conducted in the international sign language. Chaplains and missionaries mounted the lofty pulpit and voicelessly acted out the prayers, hymns and songs with eloquent looks and gestures.

Then the congregation joined in prayers and hymns.

FASHION FANCIES

ATTRACTIVE HOME ENSEMBLE THAT HELPS TO MAKE KITCHEN CHORES SO EASY

By Ellen Worth

Every woman knows she can't have too many home ensembles that will tub and tub and always come up well.

And to-day's model is just lovely. The dress is suitable for the house garden, porch, marketing, etc. And indeed, it's decidedly slimming to the heavier build.

The dress is blue and white dimity. The apron is white dimity which is also used for the dress trim.

And isn't the one-piece apron attractive? It has suspender straps and it won't slip off the shoulders.

Style No. 910 includes the dress and the apron in sizes 16, 18 years, 36, 38, 40, 42, 44 and 46-inches bust. Size 16 requires 3 3/4 yards of 39-inch material for dress with 1 1/2 yards of 35-inch material for apron and dress collar.

Patterns 15c each. Address mail orders to: Pattern Department, Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

Summer Fashion Book contains many more smart, cool vacation clothes. Send for your copy to-day, the price is 15 cents.

Marking The Ballot

Strange As It May Seem, Many Voters Muff The Job

Placing an X beside a candidate's name is a simple task but at the approaching Dominion general election it is likely 25,000 or more electors will muff the job.

In the 1930 contest 24,119 lost their votes through improperly marked ballots and there are more parties and candidates this time to confuse the voter.

Parliament places the ballots in the hands of voters and supplies pencils to mark them. That is as much as it can do. Electors have only to make the crosses themselves. Yet in 1930 ballots were rejected in every constituency in Canada.

Markings in addition to the cross, use of a pen or colored pencil instead of the black pencil provided and signing of the ballot by the voter are the most frequent causes of spoiled ballots.

Through habit many men use their fountain pens and deputy returning officers throw out their ballots. On recounts, however, judges frequently have ruled such ballots valid. The Election Act says the cross must be made with a black pencil.

Many persons start to mark their X opposite the wrong name, score it out and then mark it opposite the candidate they wish to support. This spoils the ballot. They should ask the deputy returning officer for a new one.

Voters sometimes ask why all this fuss about markings when the voter's choice is plainly indicated? The answer is that precautions are necessary to discourage bribery. They are the culmination of years of experience with elections, the frailties of human nature and the cunning of some politicians.

In the '90's and earlier when the population was small, party workers knew which voters were Conservative, which Liberal and those "on the fence." Of the undecided variety some would sell their votes and the temptation of workers in a close race was strong.

But unless the vote buyer could be sure those he bought went to his candidate there was no use buying them. Many ingenious devices were used to allow party scrutineers to identify ballots while they were being counted. The result has been the regulations to prevent distinguishing marks.

Election workers claim there is very little direct bribery now. Ridings are so populous and party affiliations of voters so indefinite it would cost too much. In addition there is the almost certain risk of the election being voided.

Would Solve Problem

Shipment Of Eggs From England Made As Experiment

A few dozen English eggs are making history. Thirty of them arrived in Sydney, Australia, after an air journey from London to Brisbane, and a railway journey of 500 miles from Brisbane to Sydney. The rest reached Rio Grande do Sul, Brazil, after travelling more than 6,000 miles from London by airplane and Graf Zeppelin. Now Lord Greenway, the promoter of the experiment, is anxiously awaiting special letters from Australia and Brazil reporting on their condition on arrival. If the eggs are successfully hatched out, one of the greatest problems of poultry farmers throughout the world will be solved. Under present conditions it is impossible for poultry farmers in distant parts to renew their stocks by introducing young chicks from England.

Post made four unsuccessful attempts to make a transcontinental flight through the stratosphere. Each time he was forced down on the way from Burbank, Cal., to New York, the last failure June 1, this year.

He used but one ship in all of his achievements—the "Winnie Mac."

Odd Trick Of Nature

Sailor Relates Story Of Three-Year Bath In 33 Fathoms

Nelson Lash was in the crew of the scalloper, *Virginia*, three years ago when she was rammed and sunk off Georges Banks. With his clothes in a forecastle locker was a pocket handkerchief, his initial embroidered in a corner.

Now Lash has his handkerchief again, for he's in the crew of the *Louis A. Thebaud*, and in her scallop drag the crew found a handkerchief—with Lash's initials in the corner, in almost perfect condition after a three-year bath in 33 fathoms!

The oldest fruit known to mankind is the olive.

Wiley Post

Some Of The Aerial Exploits Of This Famous Flyer

Here are the aerial exploits of Wiley Post, who with Will Rogers, film comedian, was killed in an airplane crash in Alaska.

With Harold Gatty, Post flew around the world in eight days, 15 hours, and 15 minutes, in 1931.

In 1933, he made a solo round-the-world flight, in seven days, 18 hours, and 49 1/2 minutes.

The following year, Post announced he would concentrate on the practical side of aviation. He made two sensational high altitude trips over his home town of Bartlesville, Okla., wearing a "super-charged suit" of his own design.

Post made four unsuccessful attempts to make a transcontinental flight through the stratosphere. Each time he was forced down on the way from Burbank, Cal., to New York, the last failure June 1, this year.

He used but one ship in all of his achievements—the "Winnie Mac."

American Boy Divers

Crude Combination Of Many Articles Enables Boys To Submerge

Three Maine youths wanted to see what the bottom of Kennebec River in Richmond, Me., looked like.

So the boys, Paul R. Dyer, Stanley Griffin and Robert Cate, constructed diving apparatus from a five-gallon gasoline can, two automobile tire pumps, a small corrugated can and some cement.

Successful in their first attempts, they plan to explore greater depths.

It has been estimated that approximately 12 pounds of air is required to burn one pound of coal.

Work Of Reclaiming Drouth Stricken Areas Proving A Major Task

If the work being started this year to reclaim drouth-stricken areas of western Canada had been undertaken 20 years ago "the farmers would not be facing the serious situation they are to-day," declared a statement issued by the prairie farm rehabilitation advisory committee. Dr. E. S. Archibald, director of Dominion experimental farms, is chairman of that committee.

Reclaiming sections where soil drifting had been exceptionally severe was a major task in itself, the statement said. This work was being directed by Dr. E. S. Hopkins, Dominion field husbandman. "Large scale co-operative efforts by which groups of farmers will undertake strip farming, the planting of trees for shelter belts around farm homes, buildings and a paddock, are also being launched. It is hoped to have whole townships included in this co-operative scheme."

Applications from 4,800 farmers have been received for advice and assistance in constructing small dams and other means of conserving water for domestic and general use on the farms. The committee intended to give all the assistance possible to these applicants.

Millions of trees were being provided to farmers and careful study made of the effect of trees as wind breaks. The drouth resistance of various grasses was being studied.

Provincial governments on the prairies as well as the universities and farmers' organizations were co-operating in the work.

The prairie farm rehabilitation act, introduced into the commons last session by Hon. Robert Weir, minister of agriculture, provided \$750,000 for rehabilitation work this year and \$1,000,000 would be voted under it in each of the next four years. In addition \$500,000 has been allotted under the public works act for water developments.

South Africans Like Cereals

Chops And Steaks Losing Place On Breakfast Table

South Africa at one time was a great meat-consuming country, and twenty years ago chops and steaks were fixtures on the breakfast menu. To-day they are a rarity, and cereals of the wheat variety have taken their place. And it is a fact that there is a marked difference in the physique generally of the present generation when compared with their parents and grandparents. The young people of to-day are not nearly so largely built.

The story of the opening of the trades exhibition in an English town where the committee of the butchers' section presented the mayoress (who opened the exhibition) with a joint of prime beef in lieu of a bouquet of flowers, presents a moral to the trade in South Africa, says a correspondent of the Cape Argus. He suggests a slogan: "Eat Meat to Avoid Death."

The Soy Bean

Is Used In Many Food Products Including Ice Cream

Chemists have found the soy bean useful in many spheres. From it are now made, in addition to valuable cattle feed, paint oil, varnish, enamels, oilcloth, linoleum, buttons, handles, box covers, windows trim sticks, electrical parts, printer's ink, glycerine, celluloid, glue, soap and rubber substitutes.

In the realm of foods for which the soy bean is useful are sixty-five different products. There is even soy bean ice cream.

The soy bean has been a farm crop in the Orient for centuries. Chinese make milk, butter and cheese from it. It was first grown on this continent in 1904.

Some people think newspapers should please everybody. It can't be done.

Politicians must envy the moon. It always comes back after an eclipse.

Paralysis In Fowl

Progress Made In Control But Experts Still Baffled

Within the last five or six years a disease known as range or fowl paralysis has become an important factor in the rearing program of poultrymen. Discovered in Europe in 1907, it first gave trouble here in 1929 when in some cases 50 per cent. of growing flocks fell prey to the disease. While some progress has been made in control, experts admit that they are still baffled.

Usually the most promising pullets are first stricken at the age of from three to five months. Older birds are not immune. An unsteady gait is the first symptom and as the disease develops birds lose power of locomotion and lie prostrate on their side or on their breast, with legs stretched backward, forward or extended sideways. Wings are next affected and birds usually become powerless. Birds are able to eat, however, and sometimes linger for three months.

For control, the following recommendations are made:

First of all, one must remove at once any otherwise healthy birds which tend to show lameness. If the condition develops, then these should be killed and burned, and if the presence of the disease is definitely established, then remove, if at all possible, pullets to a new ground. If the buildings have to be used, then thoroughly clean and disinfect them before allowing birds in. The infected ground should be dug or ploughed under and it may be considered safe after four months, if no birds were allowed on it in the meantime. Keep a close watch on pullets and remove immediately all suspected birds.

Ornamental And Useful

Fruit Of Plants Grown For Beauty Has Food Value

Beauty for beauty's sake was once considered the only reason for the growing of ornamental plants, but Dr. A. S. Colby, chief in small fruit culture at the College of Agriculture, University of Illinois, says that the food value of several ornamental plants has given them a new value. The Japanese quince is one of the shrubs recently found to possess a "dual-personality" in that its fruit is valuable in supplying additional pectin and acidulant needed in making jelly with apples or other fruit. Long ago, Indians used the fruit of the high bush cranberry to make a jelly which was eaten with buffalo meat. They called the fruit "pembina." To-day, this fruit is being rediscovered as a source of both beauty and food. Nanking cherries also come under the group of edible fruits produced on plants grown primarily for their ornamental value.

Architect Had His Way

Proved To Indian Rajah His Idea Best

A maker of beautiful things is mindful of the things that are more beautiful than anything human hands can fashion. So it was that the right reply came to the lips of a great architect when his work was questioned.

Sir Edwin Lutyens had been chosen as the architect of the new Delhi, but the Viceroy of India had different ideas about the style of the building.

Lord Hardinge wanted him to adopt the pointed arch, and said that the greatest benefactor India had ever known was Rajah So-and-so, who had always adopted the pointed arch in all the great buildings of his time. Sir Edwin Lutyens' reply to this was that the greatest benefactor to India, in his opinion, was God, and that He had not given the pointed arch when He gave the rainbow. The architect had his way.

The average income of Napoleon III. of France amounted to \$14,219 a day.

Do not wash aluminum saucepans with soda water.

Long Range Forecasts

Establish Definite 23-Year Cycle Of Weather Changes

Devastating drouths such as that of 1934 may in the future be predicted years ahead as accurately as tomorrow's weather is now forecast.

Dr. C. G. Abbott, secretary of the Smithsonian institution and outstanding authority on radiation of the sun, announced new results of his studies of the effect of variations in the sun's rays on the earth's weather which hold great promise for long-range weather forecasting. Analysis of his data shows he secretly predicted the 1934 drouth with a high degree of accuracy.

He has established a definite 23-year cycle of weather changes which is apparently dependent on a double sun-spot cycle in solar radiation. In this cycle temperature and rainfall at numerous points over the surface of the earth approximately duplicate conditions at the same points 23 years before.

Dr. Abbott was quick to point out that the repetition would not follow exactly from month to month each 23 years, but that in general, normal or abnormal weather could be expected to recur at approximately that interval. Thus another major drouth may be expected to occur in 1957.

Largest Open-Air Zoo

Is One Of The Seven Wonders Of East Africa

After a visit to the famous Ngoro Ngoro volcano crater, where in a depression many miles wide, thousands of wild game of all kinds disport themselves in what is the world's largest open-air zoo. Sir Harold Macmichael, governor of Tanganyika, has outlined plans for making it possible for automobiles to reach the rim of the crater. This will enable tourists to view one of the seven wonders of East Africa.

Until as late as 1842, Lower California was believed to be an island instead of a peninsula.

The amount of branded beef sold in Canada during June, 1935, was 3,312,501 pounds.

Fur Farming In Canada Grows In Recent Years To Considerable Proportions

A Monster Camera

Bridge In San Francisco Bay Throws Picture On Concrete

The world's largest camera has been discovered by accident in the middle of San Francisco Bay. The "camera" is the centre anchorage of the huge suspension bridge. It is a concrete affair about the height of a fifteen-story building, 197 feet long and 82 feet high.

Vent holes near the top of the tremendous box act as pinhole lenses, so directing the rays of light from outside that they cast an enormous picture on the concrete partition inside that divides the anchorage in two. The vent holes cut in the six-foot walls are rectangular apertures 1 foot by 2 feet. The pictures on the "plate holder" of the giant camera are of course upside down, as in all cameras. They show the bridge towers and passing ferry boats, sometimes in natural colors, sometimes in black and white, depending on the time of day. The principle of the pin-hole camera is an old one. Long before the development of light sensitive materials for photography, medieval nobles had small apertures cut in the walls of their houses so that they could watch life in the street outside reflected on the white wall of a darkened room.

Model Lifts Big Weight

Toy Steam Engine Capable Of Lifting Half A Ton

Perhaps the only toy model stationary engine in the world capable of lifting 1,000 pounds has been constructed by Walter Gregory, Quincy, Mass.

The engine, made at home, is run by steam, and technical experts have travelled many miles to see it.

The boiler dimensions are: Height, 24 inches; firebox, 9 inches high; 37 three-quarter-inch tubes, 15 inches long.

The SNAPSHOT GUILD

Watch Your Perspective

What would your girl friend or wife say if you made your appearance with her picture after the Sunday outing, showing her with enormous feet such as those in the picture to the left?

War would probably be declared when you made the familiar statement, "Well, dear, the camera never lies." But the truth is that the camera didn't lie for it caught just what the lens saw.

Evidently the amateur who took this picture held the camera quite low, and probably less than three feet from the two feet of the attractive young lady. Her head and shoulders were at the right distance from the camera to give good perspective but her feet were perhaps thirty-six inches nearer the lens.

Perspective in a picture is determined by the point of view from which the lens makes the picture, so after all the camera did not tell a lit-

tle white lie, but portrayed exactly what it saw and just about what the eye would see if one looked at the subject from the same point of view.

True, this is a much exaggerated example of bad perspective, but in making portraits, or indeed, "close-ups" of any object, we should be careful to see that no part of the subject is very much nearer the camera than the rest.

In making portraits we are sometimes likely to permit our subject to place a hand well forward on the arm of the chair. If working within three or four feet from your subject the hand will appear abnormally large. Better have the hands in the lap in a natural position and close to the body with most of the fingers folded under.

Now you should know how and how not to get distortion in your portraits so let your conscience be your guide.

JOHN VAN GUILDER.

Not all furs which Canadian fur companies turn into wearing apparel come from animals which roam the northwoods of the Dominion. Many of the animals which carry the most valuable fur coats have never seen the northwoods. Neither they nor their parents and in many cases their grandparents have ever seen or known the freedom of the bush. They were born and raised on farms devoted entirely to the raising of a fur crop. Government figures show that there are at least 6,473 fur farms in Canada and that their annual "output" of furs is valued at \$3,712,443.

The idea of fur farming came from the habit of trappers to capture alive young foxes and keep them near their cabin till the animals' fur coats were in their prime. So fur farms were started and fox became the main fur-bearing animal kept on these farms. Silver fox was the animal most sought by the fur farmers and so valuable did their pelts become in the early days of fur farming that a pair of silver foxes for breeding purposes cost as high as \$35,000. To-day 93 per cent. of the crop of the fur farms is silver fox.

But though fur farming has become a big business, with farms throughout Canada, it is by no means perfected. At Summerside, Prince Edward Island, there is a government experimental fur farm. And here scientists are busy developing methods whereby better furs can be raised on the farms. Diets for captive animals are given much attention and experiments are now being carried on to discover the best time of the year to supplement the regular rations of these farm-raised fur-bearers with vitamins A and D to produce a good growth of pups.

Experiments have found what they think will overcome one of the great difficulties of fur farming—parasites which infest the animals. No matter what methods have been tried, what precautions have been taken, external parasites are to be found on the animals. The Summerside scientists have developed what they now believe is a sure cure, the spraying of all kennels, nests and all the wood-work of the pens with kerosene oil three times a year. Other experiments now going on are revealing new information regarding the influence of protein content in rations on the development of fur; whether dried meat, meat meal and fish meal could replace fresh meats during summer months; work is now progressing to determine the iodine requirements of silver foxes in captivity.

While foxes are the main animals on the farms, other fur-bearers are also being raised, including mink, raccoon, fisher and marten. The mink in particular is easily domesticated and there are now 577 mink farms in Canada. Muskrat farms are rapidly multiplying and during the last three years more muskrat skins were cured than any other kind. But the silver foxes still bring in the big money, with \$867 as the high price last year for one silver fox skin.

Fur farms, in case you are interested, have a capital investment of nearly \$14,000,000 by the latest government statistics, while the animals on the farms are valued at \$7,500,000.

There remain, of course, a great many trappers who depend upon the native wild animals for existence and pit their skill and cunning against that of the forest denizens. From them, too, fur manufacturers draw valuable shipments of fur each year to grace the models of city fur shops.

Saw Long Service

One of Great Britain's historic locomotives was recently retired from service after having run 780,000 miles, reports the Canadian National Railways. It was the last of the "single wheelers" in public passenger service and was built in 1888. The most distinctive feature is the single pair of driving wheels, which are seven feet in diameter.

J. E. Goorder - Editor & Manager**HUNTERS SHOULD BE SPORTSMEN.**

CITY sportsmen who enjoy a few days' shooting each autumn owe it in a great measure to the large-heartedness of farmers and landowners who allow them the privilege of access to their lands and the right to shoot game found there. For while the provincial government requires that every hunter—other than a farmer shooting over his own land—purchase a license to shoot game birds, the holding of such permit carries with it no permission to enter upon private property. Any permission given by a farmer to shoot over his fields is an act of grace on his part, and not the hunter's right.

Rural owners as a body have been generous to a degree in granting this permission. Hunters, on the other hand, have happily respected the proprieties and by carefully closing gates and abstaining from shooting in the vicinity of stock or working teams, where the report of a gun might frighten them, have built up a fine feeling of goodwill between themselves and the men who thus provide the shooting.

Unfortunately, each season a few cases of unsportsmanlike behavior embitter owners, whose generosity has been abused, against city hunters as a body. Sometimes the offence is the result of sheer thoughtlessness rather than a deliberate breach of the code of ethics which should guide all gentlemen. But the result is the same—annoyance, loss of time and money through straying stock because someone just did not bother to close a gate; maimed animals or the more serious results of a runaway team because a hunter could not resist the temptation to withhold his shot.

Hunters should so govern themselves that no action of theirs will undermine the good feeling existing between true sportsmen, and those equally good "sports" who allow them hunting privileges.

—Calgary Herald.

"Kritiks' Korner."

The other day a visitor to our fair village remarked to us, "This is getting to be a good looking town. It used to give one the impression of being run down and neglected, but since the weeds and grass have been cut and the streets taken care of, it presents an altogether different appearance."

* * *

All weeds and rubbish should be burned before winter sets in. Leaves can be used for mulching flowers and shrubs. Gardens should be well manured and plowed in the fall.

WEEKLY JOKE

A negro mammy had a family of well-behaved boys and one day her mistress asked, "Sally, how do you raise your boys so well?" "Ah'll tell yuh, Missus," answered Sally, "Ah raise dem boys with a barrel stave—an' Ah raise 'em frequent."

Items of Interest

Ex-Premier J. E. Brownlee, K.C., has been appointed Northern Alberta solicitor for the UFA and the UFA Central Co-operative, according to an item in last week's issue of the "United Farmer."

* * *

Providing the weather man is complaisant a few more weeks Alberta will be harvesting a potato crop which advance reports indicate will be about the same in volume and quality as in 1934. In other words, there will be sufficient to meet domestic requirements and a possible surplus for export to other parts of the Dominion. At the same time the usual shipments from B.C. may be expected later simply to meet demands of the trade from B.C. potatoes.

* * *

The University of Alberta will reopen September 30 as scheduled, it has been announced by Geoffrey Taylor, assistant and spokesman in the absence of Registrar A. E. Ottewell.

Mystery death of Norman Nicholson, whose body was found beneath debris of a caved-in root-house on his farm near Glenavis, Alta. two miles northwest of Edmonton, late Saturday, is being probed by R.C.M.P. officers in the belief there might have been foul play.

Notice to Relatives of Persons On the Assessment Roll And to Tenants

Notice is hereby given that during the months of September and October, applications may be made under the provision of section 188 of the Town and Village Act for inclusion in the voters' list of the town of Didsbury by the following persons, namely:

(a) if he or she is resident with the said person within the town or assists in a business in respect of which he is taxable; and

(b) if he or she is of the full age of twenty-one years; and

(c) if his or her name does not already appear on the roll;

Tenants who have rented an assessed parcel for a period of twelve months immediately preceding the last day of August of this year.

**LEADING PAINT MANUFACTURERS
ANNOUNCE
PRICE REDUCTION**

First Quality House Paint

Now \$3.95

per gallon

(Whites Slightly Higher)

The Quality Remains Exactly The Same. Only The Price Is Changed.

Dating from to-day, the price of first quality house paints manufactured and sold by the undersigned companies is reduced to \$3.95 per gallon.

There has been no change in market conditions or manufacturing costs to justify this step. We feel, however, there is urgent need for action that will make it possible for householders to obtain the highest quality paints at the lowest price consistent with strict maintenance of quality.

Thousands of people all over the country have been forced to put off much needed painting. Thousands more have been misled by "bargain" prices into using inferior paint of little or no value. We want to make it easier for you to enjoy the advantages of painting with first quality paint only, and are confident that the generous reduction in price now announced is the best way to accomplish this.

The Political Knothole

By Bruce W. Carr
National Press Staff Writer

Dear Mom, Pop and the Rest:

Well, we got the kids off to school last week. Now it's Mr. Aberhart. The new premier of Alberta was in Toronto last weekend talking with bankers and political leaders regarding the future of Social Credit in the province—and maybe in Canada. And, who wouldn't welcome an extra \$25 a month.

* * *

And Mussolini is having his troubles too. Seems he can't get war started down in Africa. Between weather conditions, the League of Nations, and other influences the scrap with Ethiopia is still hanging fire. Maybe they'll get it underway soon, since action was to have begun by September 15th.

* * *

Anyway, in Canada, the biggest interest is in the coming federal election. With less than four weeks to go each leader of the four major parties is stumping in various parts of the Dominion. In another week or so Premier Bennett, W. L. McKenzie King and Hon. H. H. Stevens will be opening their ammunition kits in Ontario. Since this province is usually regarded as the hottest political battle ground, anything may happen.

* * *

Candidates are popping up all over the country. The present race seems to be who will have the largest number to contest the 245 seats in the House of Commons. By the week-end the number selected by each of the parties was approximately as follows: Liberal 220; Conservative 180; Reconstruction 125; C.C.F. 120; Others 22. This is a total of 667, already the largest number ever to contest an election in the Dominion.

* * *

Perhaps it is not in the interests of the present Conservative government to issue further copies of the Hyndman report. Anyway, a number of veterans' organizations have received a letter from F. G. Bronskill, chief accountant to the King's Printer at Ottawa advising, that the present edition is "out of print and we are therefore unable to fill your order."

* * *

The Federal Liberal party with its provincial cohorts, Premier M. F. Hepburn of Ontario and Premier J. G. Gardiner of Saskatchewan, are certainly putting on a concentrated drive to make it a full house of Liberals—in provincial and Federal houses. If successful, they should have little difficulty in doing their own will in this fair Canada of ours. But Alberta will still be missing.

* * *

Results of the straw vote polls being conducted by many newspapers across Canada are beginning to pile in. Already the Liberals are leading, with the Conservatives a close second. Hon. H. H. Stevens and his new Reconstruction party is in third place with the C.C.F., National Government and Communist far behind.

* * *

Straw vote results from the following newspapers (in figures), Orilla Packet and Times, Waterloo Chronicle, Simcoe Reformer, Maple Leaf Press (Gilbert Plains, Man.), Chatham (N.B.) Gazette, Mid-town News (Toronto) and miscellaneous ballots, are:

King, Liberal, 434; Bennett, Conservative, 415; Stevens, Reconstruction, 146; National Government, 68; Woodsworth, C.C.F., 64; Communist, 30.

WEEKLY SERMONETTE

"If conquered, for tomorrow's fight prepare.
If conqueror, of tomorrow's fight beware!"

CARD OF THANKS

We wish to thank our neighbors and friends for their kind help and expressions of sympathy during our recent bereavement.

—C. W. GIBBS AND FAMILY

Knox United Church Notes.

Next Sunday is RALLY Day and we are hoping for a full attendance of all our members, adherents and friends. At Westcott there will be a joint service of Church and Sunday School in charge of the pastor. There will be special music. The session of the Sunday School in Didsbury at 11 a.m. will be an open one, and we urge all interested in our Sunday School work to be in attendance. We ask the members of the various classes to bring one with them to ensure a full attendance. The Rally will be continued in the Evening Service at 7.30 p.m. There will be special music by the choir and the Rev. A. A. Lytle of the Bible Society will be the speaker. A most cordial welcome is extended to all.

RUGBY NOTES

Mrs. A. G. Smith entertained the Rugby Women's Institute on Thursday afternoon last, when the regular monthly meeting was held. Twenty members and visitors answered the roll-call.

After a short business session an excellent paper on "Reading—for Young People" was given by Mrs. J. H. Hosegood, which followed up by a good discussion on this subject. The meeting closed with the singing of the National Anthem, and lunch was served by the hostess.

The October meeting will be held at the home of Mrs. Shannon, with Canadian Industries the day's topic, by Mrs. H. Jackson.

In Praise of Common Things

By Edith Webster, Westcott

At dusk how I do love to sit Beside my window all alone, To watch the stars come twinkling out Like fairies on blue velvet thrones. Silent they reign and twinkle all the night, Unknown to many in their dreamy pleasure's flight.

I'm tired of dreaming dreams The whole day long, And tired of seeking pleasure With an empty, shallow throng. I want to harmonize with Nature as she sings; I want to learn to love the Common Things.

True, yesterday I was a Lady, Fine and gay; I wanted wealth and fame; I dreamed The whole day long. At dusk I saw a bluebird on the wing And learned to love and praise the Common Things.

Common Things, you say, The birds, the trees, the brook. Keep your majestic towers, I prefer my shady nook; Where bluebells tinkle music fit for kings, And thrushes sing all day in praise of Common Things.

WORLD HAPPENINGS BRIEFLY TOLD

French war veterans on a friendly visit to Canada were hosts to prominent Montreal war veterans and militia men.

Since Jan. 1 six swimmers in the harbor at Sydney, N.S.W., have been attacked by sharks and only two have survived their injuries.

The high price of pork has made the hunting of wild hogs a paying sport. The meat brings about nine cents a pound in Texas.

A Corning, N.Y., minister's wife was denied United States citizenship because she refused to subscribe to the stipulation that she bear arms for the United States in time of war.

Bound for Idaho, a shipment of 75 purebred Suffolk rams left Calgary recently. The sheep were consigned to breeders at Caldwell, Idaho, marking a new export outlet for Alberta.

Despite poor crops, the Doukhobor communities in the west will meet their obligations this fall, M. W. Cazakoff, Venerin, Sask., is reported as stating.

A television broadcasting tower is being built on top of the Eiffel Tower in Paris and is expected to provide regular service after three months' testing.

Apple and other fruit trees will be planted in Moscow streets instead of the usual shade variety. State farms were ordered to cultivate 140,000 fruit trees to be planted at Moscow beginning in 1938.

The crushing blow which flood waters dealt to the lines of the Northern Alberta railroads last month will necessitate immediate repair conservatively estimated at \$250,000.

The Soviet Union's grain acreage as of Aug. 15 totalled approximately 142,000,000, an area comprising 68 per cent. of the cultivated cereal lands, it was announced. The figure is about 7,000,000 acres above that for the same date last year.

William Green, president of the American Federation of Labor, said in a speech before the state labor federation's convention that the six-hour working day and the five-day working week must come, if jobs are to be given those who did not have them.

Gifts For Aviators

Winnipeg Pilots Going To South Pole Wear City's Crest

When Pilots H. Hollick-Kenyon and J. H. Lymburner fly with the Lincoln Ellsworth expedition down in the South Polar regions during the coming summer months of the southern hemisphere, they will wear pinned to their breasts, two small silver replicas of the coat-of-arms of Winnipeg.

The gifts were presented to the men by Mayor John Queen at a dinner given by the Aviation League of Manitoba. "These mementoes," said the mayor, "will carry the good wishes and the high hopes and expectations of the people of Winnipeg for your success."

"But they are like a Scotch gift," his worship added. "There is a string attached to the giving. When you come back next May, I presume the Aviation League will have a celebration in honor of your return, and we want you to hand them back to the mayor of Winnipeg then so that they can be framed and kept in the city hall as mementoes of the interest the city of Winnipeg has in this expedition, which we hope will be historic."

J. B. Coyne, president of the league, said Manitoba has a special interest in polar expeditions by reason of the fact Franklin tried to find a northwest passage to the Orient north of Canada, and so gave a lead to Arctic exploration.

The flight which will be undertaken by Lincoln Ellsworth, with Hollick-Kenyon piloting, between Weddell Sea and Ross Sea, is 2,800 miles, as far as from Montreal to Vancouver.

Only the very poor or the very rich are able to own more than one dog.

French military authorities have ruled that bandsmen must learn to be telegraphers too.

IN VICTORIA, B.C.

It's Victoria's tree-shaded motor roads that have helped to win for the city the name of Canada's Evergreen Playground.

Acrobatic Roller Skaters

Three High-Speed Russian Artists Performing In London

The most "revolutionary" Russians in the world have arrived in London. They are the Three Cossacks, high-speed acrobatic roller skaters, (two men and a girl), who whirl round at 130 m.p.h. on a table only eight feet square.

"This is the smallest table anyone has ever skated on and lived," John Gajkosky, the leader, said at the Savoy, where the trio are appearing in cabaret.

"There is a black line running round the table several inches from the rim. All the time we are spinning we keep our eyes on that line and never go outside it."

"Our slowest speed," he said, "is 60 m.p.h., and when working up to a climax we sometimes touch 150 m.p.h."

The Three Cossacks' chief fear is "centrifugalitis"—breaking of blood vessels in the eyes or legs due to their becoming overloaded in the high-speed whirling.—London Daily Mirror.

Story Of Homer's Iliad

Professor R. A. Dara has placed in a London safe deposit manuscripts 3,000 and 4,000 years old, which, he says, prove that the story of Homer's Iliad, greatest of classical Greek poems, the epic of Helen of Troy, whose face "launched a thousand ships," originated in an Indian epic poem written centuries before Homer was born.

Professor R. A. Dara has placed in a London safe deposit manuscripts 3,000 and 4,000 years old, which, he says, prove that the story of Homer's Iliad, greatest of classical Greek poems, the epic of Helen of Troy, whose face "launched a thousand ships," originated in an Indian epic poem written centuries before Homer was born.

Insect Killing Machine

Engineer Uses Artificial Fever To Annihilate White Ants

A neat little gadget that applies the "artificial fever" method of treating certain human diseases to the problem of ridding the civilized world of unpleasant insects is on exhibition at San Francisco.

Electrical Engineer E. L. Brown, inventor of the apparatus, demonstrated its use before a score or so of California's most noted scientists, who watched with great interest while Brown annihilated a colony of termites flourishing in a piece of wood he had with him.

Termites, ant-like creatures that live in and on wood, are fast becoming a major menace in American life, according to recent surveys. In fact, they are estimated to cost American property owners about \$50,000,000 each year, and the possibility of their eradication excited great interest among the assembled scientists.

Brown's insect killing machine operates with "cold heat." Short radio waves passing between two electrodes have the effect of generating sufficient heat to kill the bugs without setting the wood in which the little nuisances are living, afire.

The cornerstone of the original U.S. capitol was laid by President Washington on Sept. 18, 1793.

Blue, green, yellow, red and even black snow has fallen in various parts of the world.

Found Mexico Interesting

Rotarian Delegates Report Temperature Even And The Climate Ideal

No need to go to Alaska to be cool or to Egypt to see the pyramids, according to Mrs. E. B. Flint of London, Ont., who with her husband, attended the Rotary International convention in Mexico City. It's never too hot and never too cool down there, and the Aztec pyramids are almost as interesting as the famous ones on the banks of the storied Nile.

Mexico, situated 7,500 feet above sea level, has an even temperature, never above 78 and never below 60, the visitors were told. It has retained many quaint customs.

In a city of more than 1,000,000 inhabitants there are only two machine laundries, Mrs. Flint said, for the women still adhere to the primitive method of washing their clothes in the streams with a flat rock to rub on.

The pyramids built by the Aztecs several hundred years ago, were of great interest, and not the least amazing feature was a primitive but effective shower installed in a niche in a wall. The delegates had a Mexican dinner in a restaurant made in a cave below the pyramids.

The Floating Gardens, where land is so valuable that no houses are built on it, was also another place of interest. It is possible to raise seven crops of corn a year on this land, and if a man sells a strip he merely digs another canal instead of building a fence to define the boundary.

Obsolete Laws Unearthed

Sadly Out Of Date

Detroit Has Some City Ordinances

Detroit, Michigan, still has a speed limit of six miles an hour for horses and sleighs and an ordinance against leaving oxen untied in the streets. In a letter suggesting that the city ordinances be overhauled and obsolete bylaws culled out, City Clerk Richard W. Reading points out that it is illegal to hitch a horse to a fence around the Soldiers' and Sailors' monument in Cadillac Square although there has been no fence there for years; that it is illegal to herd goats, sheep or cows in the streets, or to allow geese on Woodward avenue, or to back mules across a sidewalk.

Will Earn His Pension

Man Starts 700-Mile Walk To Get Birth Certificate

Intent on proving that he is more than 70 years of age, and entitled to the Ontario old age pension, William Staley has started on a 700-mile journey, most of it by foot, in search of his birth certificate. His destination is more than 100 miles northwest of Chicago. There he hopes to get his birth certificate from relatives who have refused to forward it to him by mail. Most of his life has been spent in rural districts about 40 miles northeast of Toronto, and it was from there he started his journey.

Monster Ice Breaker

Russian Ship Will Keep Northern Sea Route Open

Declared by Soviet authorities to be the largest ice-breaker in the world, a ship with 24,000 horsepower engines is being constructed near Leningrad. The new craft will be able to cross the 4,000 miles of the northern sea route without refueling. Other ships can follow in its track, greatly accelerating the journey. It is hoped that Arctic exploration also will be facilitated.

Advertised On Bank Notes

Chinese Medicine Men Had Most Unusual Idea

Chinese patent medicine shops in Canton are using money as an advertising medium. They stamp their names, address, and telephone number on all banknotes which pass through their hands, with a list of articles for sale. The banks have had to issue an order forbidding the practice.

Dear Old Soul—But, doctor, if this is going to make me 10 years younger, how do I stand about my old-age pension?"

Little Journeys In Science

IRON

(By Gordon H. Guest, M.A.)

Iron has played a very important role in the history of mankind and for many centuries has been the most useful of all the metals. The iron used by ancient man was soft and malleable. Some of the early peoples made chariots and defensive weapons of it, but a sword that would bend easily was of little use as compared with weapons of stiff bronze. The smiths of the eighth century knew how to harden and temper iron and they ushered in the age of chivalry with steel-clad knights. The products of these skilled workers of the medieval forges—Toledo blades, Damascus scimitars, Italian chain mail, and Moorish armor—are famous in song and story. Indeed, they were almost as good as their legendary reputation.

Iron occurs very abundantly in nature and makes up about five per cent. of the earth's crust. Scientists have calculated that the centre of the earth consists of a sphere of metallic iron 4,000 miles in diameter, and covering this sphere is a layer of silicate of iron and magnesium 1,000 miles thick. If this is true, iron is by far the most abundant element in the world. Iron is found combined with other elements in many minerals and in most rocks and soils. It is a constituent of the green coloring matter of plants and the hemoglobin of the blood of animals, and hence it plays a very important part in life processes.

Hematite, known by the scientist as ferric oxide, is the most important of all iron ores. This ore is found in large quantities in the neighborhood of Lake Superior in the states of Minnesota, Wisconsin and Michigan. It is interesting to know that hematite gives a red color to certain soils and rocks. Finely divided hematite is used very extensively as a pigment.

Brown hematite, or limonite, is another very important iron ore. This mineral imparts a brown color to soil. It is present in many ordinary clays; and when they are used to make brick and earthenware, the material turns red when it is fired.

Magnetite is another important iron ore and this mineral is attracted by a magnet, which fact is sometimes used in separating this material from crushed earthy matter. Lodestone, a natural magnet, is a variety of magnetite.

Iron differs from some of the other metals used in the industries in that the pure metal is rarely obtained and is of limited application. Iron which contains small quantities of other elements shows a great range of properties and is of the greatest industrial importance. Carbon is always present in quantities which range from slight traces up to seven per cent. There are many varieties of commercial iron, the chief of which are pig iron, cast iron, wrought iron, and steel.

Demand For Lemons

People In Italy Are Using Them For Their Health

A report from Washington says there is a lemon shortage, due to the falling off of imports from Europe, which is accounted for by the Italian purchases of lemons for the use of the Italian expeditionary force against Ethiopia.

That, however, is not the whole truth. Americans returning from Italy report that country completely daffy on the subject of lemons. The Italians have discovered that the lemon is not only a preventive of scurvy, but a reducer of high blood pressure and a cure for fallen arches. A dozen lemons a day keep the doctor away. A gentleman in Cremona is reported to have healed himself of whatever ailed him by consuming 60 lemons a day.

The enormous demand for lemons to keep Italians healthy has put under requisition the entire Sicilian crop, and lemons are being imported from Spain, Portugal and Greece. The Italian colonists in Africa are rolling in wealth.

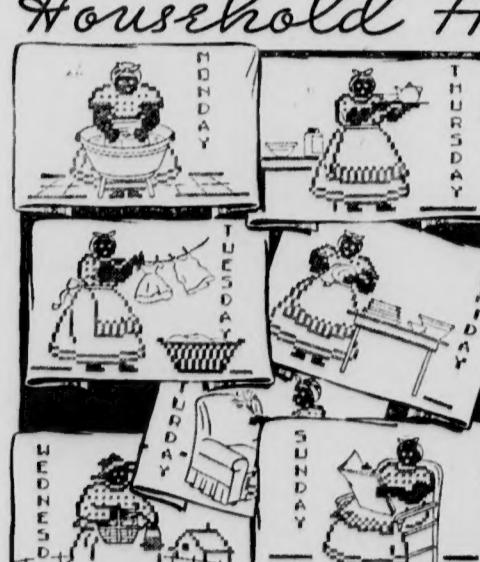

From the medical standpunkt there is something to be said for the new craze, for in a country where butter is scarce and nearly everything is cooked or doused in olive oil, an acid in the diet is essential.

Meanwhile the Italian consumption of lemons is bringing joy to California growers, who hope that prices will go up still further.—Detroit News.

Panama is attempting to grow rubber, and 30,000 trees are being planted.

The fellow who tells you how hard he works wouldn't have time to tell you so if it were true.

Household Arts

PATTERN 5250

Dress up your kitchen so you will be proud of it! Add decoration with these effective mammy towels. You'll love embroidering them—each motif is a different household task—each lends itself to the use of a variety of colors—and there's one for each day of the week. Make them for the bazaar—for a bridge prize—a shower gift. Their droll design will make them welcome anywhere.

In pattern 5250 you will find a transfer pattern of seven motifs averaging 5 1/2 x 7 1/2 inches; material requirements and color schemes.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermot Ave. E., Winnipeg.

There is no Alice Brooks pattern book published.

MISS ALADDIN

—By—

Christine Whiting Parmenter
Author Of
"One Wide River To Cross"
"The Unknown Port", Etc.

SYNOPSIS

Nancy Nelson is a sub-deb, a gay, irresponsible girl of nineteen, with no care beyond the choice of her costume for her coming-out party. Suddenly, in the market crash, her indulgent father loses all he had, and his family is faced with the necessity of a simpler method of living. At this juncture a letter is received from an eccentric relative in Colorado, who offers the girl a home on what seems to be impossible conditions.

After much consideration Cousin Columbine's offer is accepted, and Nancy and Jack arrive at Pine Ridge.

Nancy set out one afternoon to climb to the top of a hill so as to obtain a view of the surrounding landscape and misses the path Aurora Tubbs had told her to follow. A truck comes along the road, driven by Matthew Adams, and she asks him which way to go. They ascend the hill, look around, and then go on to Cousin Columbine's. There Mark Adam tells Nancy that his brother Luke has broken his leg, and that Jack Nelson has been hired to help out while Luke's leg gets better. With Jack away, Nancy finds that she is lonesome, and having no books to read, the idea of starting a public library at Pine Ridge seems a good one, and Nancy writes home to get her parents to send all the books they could spare and all they could induce others to let them have.

Nancy and Matthew Adam go Christmas shopping in a neighboring town. On their return to Pine Ridge, Nancy is amazed to see the Columbine residence all lit up, and asks Matthew if he knows why. He said: Let's go in and see. Then Nancy learns that she is having her debut, but in a different setting than had been planned for her in Boston.

Now Go On With The Story

CHAPTER XIV.—Continued

"She was a courageous woman, my mother, but I have sometimes wondered what was in her heart as she set me on my feet and moved toward that door, unarmed. Did she expect to confront a band of roving savages? What met her eyes was a single brave, and a boy of, possibly, seven years old. No doubt the Indian looked sinister enough. Only the week before a woman not many miles away had been scalped and mutilated. The horror of that story was still upon her; yet she did what may have been the only thing that protected herself and me. My mother smiled! It was, I imagine, a smile born out of terror; but to that grim-visaged Indian it was a gesture of friendliness. Who knows but had there been more such gestures, one page of our history would have been less tragic. And then, although her hands were so tightly clenched that (she found later) the nails had pierced her flesh, she looked straight up at him and said two words—words which sounded strange to her own ears in such a moment. Per-

WHEN YOUR DAUGHTER COMES TO WOMANHOOD

Most girls in their teens need a tonic and regulator. Give your daughter Lydia E. Pinkham's Vegetable Compound for the next few months. Teach her how to guard her health at this critical time. When she is a happy, healthy wife and mother she will thank you.

Sold at all good drug stores.

Lydia E. Pinkham's
Vegetable Compound

haps you have guessed them, for what my wonderful little mother said was: 'Merry Christmas!'

Miss Columbine paused, and there was silence until Aurora Tubbs exclaimed: 'But you ain't tellin' us that that wild Injun knew what she said, Miss Columbine! It's not believable.'

The old lady seemed to be looking at something far away.

"Not the words," she answered, "but perhaps he understood the smile; and she spoke gently. He came into the room, followed by his boy, and stood, arms folded, looking down at that small, gay tree and that happy little girl who knew no fear. For a moment I was too absorbed to note the callers; then, glancing up suddenly, I laughed with pleasure. Here was another child! I held my doll aloft so that the Indian boy could see it. 'Look!' I cried joyously. 'My new baby! See!'

"The boy reached out and took it from me, his white teeth gleaming in a quick smile. The man grunted something unintelligible and moved nearer the tree. He seemed, my mother told me, both puzzled and admiring, like a big child wondering what it was all about. He touched a yellow butterfly made from a scrap of paper; said something more, letting his glance rove slowly about the room. Her heart quickened as his eyes rested on the rifle; then subsided when he made no move to touch it. The boy, still admiring my homemade doll, said something rapidly and took from his neck a string of beads, holding them out to me. It was, my mother understood, meant as an exchange for my clothespin baby, and fearing trouble should I rebel, she said: 'See darling, he has brought you a Christmas gift! Let him keep your dolly. I have another exactly like it for you; and this poor boy has no lovely tree, perhaps no mother. Tell him to keep it.'

"My lip trembled; but she took the beads and put them about my neck, and suddenly I was enraptured with this new treasure. Apparently I was desirous of doing something for the other Indian, for I lifted the paper butterfly from its branch and held it out to him, saying: 'It's your Kismus gif, man! Merry Kismus!'

A breath of pleasure swept through her audience as Cousin Columbine ceased speaking; then she continued: 'I seem to remember the Indian stooping to take my offering. I know he smiled, though that is something my mother never corroborated. He grunted a word or two, intended, she was sure, as thanks; gave one more curious look at the small tree; and then they left us, those strange, strange Christmas guests, mounting their ponies and riding into the forest, disarmed, my father used to say, by a smile of welcome.'

"And did you ever see them again?" questioned Eve Adam, her low voice very gentle. "Never again. What they came for—where they were going, we never knew. And only a half hour later there sounded close to that well-barred door, the clear, sweet note of a hermit thrush! Not until then did my valiant mother give way to tears."

Said Matthew Adam, gravely: "That is the nicest Christmas story I ever heard, Miss Columbine."

"And now," suggested his mother, going to the melodeon, "let's end our evening by singing some of the good old carols."

Later that night when the guests had departed and the Nelson mansion stood quiet in the moonlight, Nancy went to her tower and gazed for a moment at the snowy Peak. It had been a long, exciting day, and suddenly conscious of being tired, the girl opened the window and slipped gratefully into her big black walnut bed.

The moon was very bright and she saw quite clearly Aurora's calendar and the military figure of General Grant, looking down upon her from the wall. She saw too, that her chiffon gown lay where she had tossed it carelessly, in close proximity with the patchwork quilt, and Nancy smiled to herself, there in the moonlight.

"Chiffon and calico!" she murmured drowsily. "I guess they aren't so far apart as I used to think!" Then her eyes lifted to the steel engraving and she laughed a little.

"Good-night, General Grant," she said politely. "I was pretty insulting

to you at first, but I believe I'm getting to rather like you. Perhaps it's the uniform. They say that sooner or later a woman always falls for a uniform. I'm sorry you weren't downstairs this evening, General. It—it was a wonderful debut!"

CHAPTER XV.

It was at Christmas dinner that Nancy divulged her plan for the Aladdin Library, a proposition which met with instant enthusiasm. John Adam readily agreed to supply the sign; and one day in January Mark brought it in from the ranch.

"Dad's been so temperamental you'd think he was painting a picture for the Art Museum," he declared. "Honestly, Nance, since you wished this job on him that man's neglected his cooking shamefully; but the sign's a corker."

"I'll say it is!" Nance spoke almost with awe. "I never expected anything so—so professional, and those Aladdin lamps at either end are stunning. Your father must have spent a lot of time on this sign, Mark. Can you put it up if we go over to the schoolhouse now?"

"I came prepared, lady; and there's a box of books at the station which our sweet young Denver cousin collected for you. Matt'll be down to finish the shelves this afternoon, and—Hi there, Aurora Tubbs! Come see this sign."

Aurora emerged from the kitchen, and stood, arms akimbo, admiring eyes on John Adam's handiwork.

"If it don't look exactly like a boughten one!" she exclaimed. "But if those fancy things is meant for lamps, Mark Adam, they must be terrible old-fashioned and hard to fill. Your father's a regular artist, ain't he? I wonder would he letter me some callin' cards. I've hankered for some o' the silly things ever since Victor's cousin Ella had some writ by a one-armed soldier who was doin' 'em in a doorway in Denver."

"Sure he'll do 'em for you," Mark promised recklessly. "Hello, Miss Columbine. Just look at Father Adam's masterpiece."

Cousin Columbine came briskly down the steps.

"It's a beauty, isn't it?" said Nancy, her face glowing.

"It surely is. Are you going to put it up to day, Mark?"

"Soon as I swipe a ladder out of your barn. You'll have to come along, Nancy, and boss the job."

Those days were full of interest, for Aunt Louise and the girls at school had responded generously to Nancy's plea for books. Mother and Dad had doubled the number; Phil had collected twenty more; and Aunt Judy, immediately on hearing about the scheme, had sent a check for the purchase of new ones.

No check had ever looked so big to Nancy Nelson, or been so welcome; and one day Mark drove her to the Springs to purchase this important addition to her library. He also improved the occasion considerably by taking her to lunch at the Antlers Coffee Room, and to a movie.

It was dark when they reached Pine Ridge again, to find Aurora declaring that their mangled bodies were doubtless at the bottom of some ravine. In fact, as Mark said later, she looked a trifle disappointed when they arrived safe and sound in her shining kitchen!

"Didn't I say you were demented, Aurora Tubbs?" observed Miss Columbine triumphantly.

Despite the tone, her faced looked

Little Helps For This Week

God is not unrighteous to forget your work and labor of love which ye have showed toward His name, in that ye have ministered to the saints, and do minister. Hebrews 6:10.

Wherever in the world I am, In whatsoe'er estate, I have a fellowship with hearts To keep and cultivate, And a work of lowly love to do For the Lord on whom I wait.

We do not always perceive that the commonest things, the writing of a note, the making of something intended as an offering of affection, our necessary intercourse with characters that have no congeniality with our own, may be made the performance of a most blessed and sacred work, even the carrying out, after our feeble measure, the design of God for the increase of happiness.

Definite work is not always that which is cut and squared for us, but that which comes as a claim upon the conscience.

Tackles Big Job

Mayor Of New York Aims To Make City Noiseless

New York City, with all its hustle, bustle and commotion, free of unnecessary noise, is the job tackled by Mayor F. H. LaGuardia. Shrieking autos, blaring radios, rumbling trucks and noisy garages—anything that makes a noise—are to be curbed. Even police patrol cars and fire engines must not use their sirens unnecessarily. Heading the mayor's planned program is a month of "noiseless nights." He thinks everyone should be able to enjoy sleep, uninterrupted. That campaign will operate through October. Then, during November, will come a month of hoped-for "noiseless days." The mayor thinks that by the end of that month he'll have everybody enjoying 24 hours of quiet each day. The mayor has created the job of "NAC"—Noise Abatement Commissioner—and given the portfolio to Major Henry Curran. Major Curran now is in Europe studying noise abatement systems.

Rabbits Cause Floods

Dykes Burrowed Nearly Hollow, Reason For Their Collapse

Rabbits have been responsible for serious floods in the Swiss canton of Valais. Intense heat throughout Switzerland has melted an unprecedented quantity of snow, which has swollen the headwaters of the Rhone into flood tides.

This rare contingency is provided against by dykes built on the banks of the rivers. These, however, collapsed due to the fact that they had been burrowed nearly hollow by a vast colony of rabbits.

Founded June 13, 1874, by George and Mathew Beatty and with agencies, warehouses, offices or depots across Canada, New Zealand, the United Kingdom and fifty other countries, the national and world-wide exporting house of Beatty Bros., manufacturers of washing machines and farm implements, celebrated its Diamond Jubilee at Pergus, Ont., last month.

John F. Sweeting, industrial commissioner of the Canadian Pacific Railway, states in an official publication of the railway that there is a decidedly firm tone of confidence in the West and increased activity in many industries, with the tourist business promising to be better at all resorts this year.

An increase of 877,900 lbs. in the Nova Scotia lobster catch during the month of May was instrumental in raising the landed values \$333,468 over the same month in 1933, according to an announcement by the Department of Fisheries on June 22nd.

LOCAL & GENERAL

The duck hunting season, which opened Monday, claimed its first victim in the Edmonton district, when Harry McKernan, 40, was drowned in Cooking Lake. The accident occurred shortly after noon when McKernan waded out after his boat, which had drifted from shore, became mired in the muddy bottom and went down.

"Immediately I heard a Social Credit government had been elected in Alberta I wired to buy Alberta Bonds, because under Social Credit they will be a better investment than they were before," said the Rev. Dr. Hewlett Johnson, Dean of Canterbury on his arrival Tuesday at Ottawa. Dean Johnson is an advocate of Social Credit and will deliver a series of addresses throughout Canada.

"In a long stretch of depressing days we are prone to think that Life's Gloom is more than Life's Glory. But it is not so. The fog is always scattered; the gloomiest days get slit at last by the returning sunbeams."

NOTICE

In the interests of public health and in order to prevent if possible the recurrence of an epidemic of dysentery, all citizens, including the vendors of food and restaurant keepers, are urged very strongly to see that all screens and screen windows are made tight. "Prevent flies from getting in, but if they get in—swat 'em."

See that as much garbage as possible is burned, and if you cannot burn it all, have it placed in covered containers to await removal by the Scavenger.

All toilets should be made fly-proof. Make all requests for the Scavenger or Sanitation Service at the Office of the Town Secretary. Prompt attention will be given to such requests, and it is hoped that each and every citizen will co-operate in keeping the Town clean.
